DETAILED ACTION

- 1) This is a Restriction/Election requirement

Election/Restrictions

- 2) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 5, 6, drawn to Presentation Processing of Document – Edit, composition or storage control, classified in class 715, subclass 530.
- II. Claims 2, 4, 7, 8, 9, 10, 11, drawn to Database or File Accessing – Query processing, classified in class 707, subclass 3.

- 2-1) The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as identifying articles for identification information for recording into a storage without the mention of searching and subcombination II has a separate utility of searching for messages in a storage and outputting message if a match is detected. See MPEP § 806.05(d).

- 3) Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 4) Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
